

Wayne Ramey, President & Owner

Wayne has had the fortunate opportunity to start in the water and wastewater treatment industry at the bottom. In 1985, Wayne started his operations and maintenance career at the Town of Cedaredge on the western slope. Learning how to "make do" with minimal tools and equipment while maximizing what he had to work with and make it work better was an immensely valuable lesson. Wayne's chief duties involved the maintenance and repair of the water treatment plant and distribution system.

After Cedaredge, Wayne went to work for the City of Louisville as an operator trainee at the wastewater treatment plant. The lessons that Wayne learned at the Town of Cedaredge would influence him to improve himself, those that worked with him and the treatment plant. Wayne's enthusiasm for his co-workers and the treatment plant led him to the Superintendent's position in 1989. Having the ability to really build a team of dedicated plant operators and building the trust of management to implement programs that drastically reduced operational costs while improving the performance had it's reward. In 1992, the City of Louisville won the U.S. EPA Region 8 Excellence Award and the NATIONAL 1st Place Award for Operations and Maintenance Excellence from the U.S. EPA.

In 1994, Wayne left the City of Louisville and went to work for the City of Broomfield as the Superintendent for the Wastewater Treatment Division. Again, working with and empowering his co-workers, the City won the NATIONAL 1st Place Award for an Outstanding Pretreatment Program in 1998. In 1999, Wayne was promoted to Deputy Director of Public Works.

REC, Inc. has built it's relationships with our employees, regulators, peers and clients with the same enthusiasm and respect for our work. REC, Inc. is dedicated to providing the level of customer service that is far superior to our competitors. Everyone at REC, Inc. is given the opportunity to excel, to provide stellar customer service and to go above and beyond what the system needs. Simply stating that "it's good enough" is not who we are or what we stand for. Anyone can do the job for less however, are they willing to provide the customer service that your water or wastewater system deserves?

"I feel very fortunate to be involved in something so important as water and wastewater treatment."

- Wayne Ramey, President & Owner

"Ramey Environmental Compliance is a Colorado based company that offers award winning service in the maintenance and operation of water and wastewater treatment facilities"

Our Commitment

Ramey Environmental Compliance undertakes every project with an attitude and approach that promotes innovation, creativity and fiscal responsibility. It is our reputation for trustworthiness, integrity and customer service that is our trademark. Our hope is to institute an alliance with our clients that will promote trust and understanding of the needs of the system and our ability to keep costs down so that all can afford clean, safe drinking water and wastewater treatment. We know how precious water resources are to a community and its constituents.

Our clients benefit from low overhead and extremely cost effective operations. Our staff has over 40 years of state certified experience in operating and managing small to large treatment facilities for the Rocky Mountain Front Range communities.

Our approach to plant management is state-of-the-art, and widely recognized by municipalities, districts, private developers, engineering firms, and regulators at the state and federal levels.

Let us show you how to keep your system in compliance and costs within your budget!

Our Services

Ramey Environmental Compliance, Inc., a Colorado based company, specializes in professional contract operation and maintenance of water and wastewater facilities as well as collection and distribution systems. REC, Inc. serves clients throughout the Rocky Mountain and Eastern Plains Region. REC, Inc. is continually expanding our service areas with long term satisfied customers.

Water & Wastewater Plant Operations, Maintenance and Management Include:

- Facility Management
- Process & Plant Troubleshooting
- Plant Performance Evaluations
- System Rehabilitation
- Microscopic Examinations
- Sampling & Analysis Programs
- Process Control Instrumentation
- Preventative Maintenance Programs
- Biosolids Management
- Flow metering and Studies

Water Distribution & Wastewater Collections Maintenance and Management:

- Collection line jetting
- Collection line vacuuming
- Root Cutting
- Pump Station Maintenance
- Emergency Service
- Lift Station Maintenance
- Televising (VHS & DVD) format
- Root Foam Treatment
- Leak Repair

Operations & Maintenance Personnel

Ramey Environmental Compliance, Inc. provides you with professionally trained, certified operators and maintenance technicians. Our service includes:

- Certified Collection & Distribution Technicians
- Emergency Economical 24 /7 Service
- Training & Safety Programs
- Laboratory Setup & Training
- Operational Staffing & Services
- Trained & State Licensed Operators

Special Services

Ramey Environmental offers a wide variety of quality assurance services:

- Meter Reading
- Biosolid Reports
- Biological Surveys
- New Facility Start-Ups
- Discharge Monitoring Reports
- Plant Performance Evaluations
- Industrial Pretreatment Compliance
- Septic Tank Inspections
- Water & Sewer Tap Inspections
- Annual Reports
- Budget Assistance
- Biosolids Permitting
- Utility Rate Studies
- NPDES Permit Applications & Renewals
- Consumer Confidence Reports
- Biosolid Treatment and Disposal
- Grease Trap Inspections
- Water and Sewer Line Inspections

REC, Inc. Personnel

All REC, Inc. operators/technicians are thoroughly trained and experienced in plant operations and maintenance.

All certified operators are trained in process control testing and interpretation. They perform preventative, corrective, and emergency maintenance as required; maintain clean buildings and grounds maintenance.
